

AAYAN IRSHAD DESAI

QA Automation Engineer | Full-Stack Developer

Al Nahda, Sharjah, UAE | +971 56-123-5034 | aayanirshad99@gmail.com

github.com/Rapid1234-star | linkedin.com/in/aayan-desai

SUMMARY

Cybersecurity-focused Computer Science student and QA Automation Engineer with hands-on experience building large-scale Playwright test suites, production web systems, and AI-driven automation pipelines. Skilled at engineering authentication workarounds, validating endpoint remediation at scale, and shipping full-stack applications from React/Node.js frontends to Python-based computer vision systems.

EXPERIENCE

QA & Automation Intern | Patchifi

Apr 2026 – Sept 2026

Remote | Cybersecurity & Patch Management Company

- Test Engineering & Authentication:** Built and maintained 650+ automated Playwright test cases across 8 core platform modules (Dashboard, Access Control, Patch Center, and more), and engineered a custom OTP-polling/session-reuse workflow enabling 550+ tests to run under one authenticated session — eliminating redundant OTP requests and cutting regression runtime.
- Workflow Automation:** Designed and deployed an n8n + AI pipeline that auto-publishes company blog content to LinkedIn, then pitched 10 additional automation opportunities directly to the CEO.
- Endpoint & Systems Testing:** Validated 22 endpoint remediation scripts (14 disable-update, 8 update) for Chrome, Edge, Firefox, and Dropbox via Azure Bastion, verifying Windows Registry policies, services, and scheduled tasks across virtual machines.
- Web QA & Production Maintenance:** Led a full desktop/mobile QA audit of the production Wix site, logging defects in a screenshot-backed tracker, then resolved UI issues and configured email-gated download forms.

Tools: Playwright, JavaScript/TypeScript, n8n, Wix, Azure Bastion, Windows Registry & Services, Excel

PROJECTS

Internship Management System | [GitHub](#) | Node.js, HTML, CSS, JavaScript

- Architected a full-stack internship portal with role-based access control, secure authentication, and optimized database queries for high-performance data retrieval.

AI Resume Analyzer | [GitHub](#) | TypeScript, JavaScript, AI Integration

- Built a TypeScript-based analyzer that dynamically parses, evaluates, and scores resume content, improving scoring accuracy by 30%.

Voice Scam Shield | [GitHub](#) | TypeScript, JavaScript, AI Integration

- Prototyped a real-time web application for detecting and flagging voice-based fraud and scam patterns.

AI Face & Object Detection Systems | [GitHub](#) | Python, OpenCV, JavaScript, COCO-SSD

- Developed a Python facial recognition system with real-time image processing (20% accuracy improvement across lighting conditions), plus a browser-based object detector using the COCO-SSD model.

Hand Snake | [GitHub](#) | React, TypeScript, MediaPipe, Python

- Built a hand-gesture-controlled browser game combining MediaPipe motion tracking with a React/TypeScript frontend and a Python reference engine.

SKILLS

- Languages:** Python, JavaScript, TypeScript, C++, SQL
- Frameworks & Tools:** React, Node.js, Tailwind CSS, Playwright, OpenCV, Git/GitHub, n8n, Azure Bastion, Wix
- QA & Automation:** Test Case Design, Test Automation, Regression & Production Testing, Defect Tracking, Test Reporting
- Systems, Security & Practices:** Windows Registry & Services, Endpoint Remediation, Cybersecurity Fundamentals, Agile Workflows

EDUCATION

University of Wollongong in Dubai

April 2025 – April 2028

Bachelor of Computer Science, Specializing in Cybersecurity | Dubai, UAE

CERTIFICATIONS

Google Cybersecurity Professional Certificate • Meta Front-End Developer Professional Certificate • Microsoft Python Development Professional Certificate
